January RASC General Meeting

for all members and guests, Room 175 Physics Bldg
University of Saskatchewan, on

Monday, January 15th, 2018 at 8:00PM

Presented by Ron Waldron:

Norwegian Astronomy Above the Arctic Circle

Last October, Ron Waldron spent two weeks as a Road Scholar exclusive instructor aboard the Kong Harold Cruise ship. The cruise took him up the west coast of Norway from latitude 62 degrees north to latitude 71 degrees north of the Arctic Circle. While on board, he gave ten one hour lectures, four on the northern lights and six on astronomy.

Weather conditions both on the cruise path and on the sun were cooperative and eight clear nights were had to view and photograph the aurora. Ron will give a digitally illustrated talk on his trip along with a five minute video of the northern lights as captured by colleague Alan Dyer who was on another ship at the same time. Ron is scheduled to repeat the cruise this February and then travel to Churchill, Manitoba for three weeks in March to give a similar program.

Note: There will be an Executive Meeting at 7:00PM

Minutes of the November Meetings - *Marcel Müller-Goldkuhle*

Minutes of the Executive Meeting, Nov 20, 2017

Book Sale – Jim Gorkoff

Members should e-mail me at jgorkoff@yahoo.ca if they want to buy any of these titles. They will be sold on a first come first serve basis. That means first to pay their money and pick up their book, not first to put in an order. The price includes applicable sales taxes. This is a going out of business final stock sale; so, sales are final and once the items are sold out they will not be reordered. These items will not be shipped. Arrangements will have to be made for pick up. Some of these items will make a good Christmas gift. Although none of the books are second hand, many are old and hard to otherwise find. This sale ends on 15 January 2018.

Observers Group – Larry Scott

Our Observer's Group for November 18th was cancelled due to clouds. I was unable to get out to Sleaford for observing on any other nights as well. Although there is no scheduled Observer's Group for December, there is an excellent observing opportunity on December 13/14th with the return of the Geminid Meteor shower. There will be moonless evenings from December 8th to the 23rd and given decent skies I will try to get out to Sleaford on the weekend of the 22/23rd. Happy Holidays everyone.
